SUMMARY

Final year B.Tech (CSE) student with a focused interest in Artificial Intelligence and Machine Learning, passionate about building intelligent, data driven systems to solve real world problems using advanced machine learning models and analytical techniques.

EDUCATION

Bachelors of Technology in Computer Science and Engineering, 09/2022 – Present
University of Kashmir Srinagar, India

CGPA: 7.01 (at the end of 6th semester)

Higher Secondary School Certificate (Class XII), Srinagar, India
Jammu and Kashmir Board of School Education

Percentage: 90.60%

PROJECTS

SmartHire - An AI-Driven Recruitment Application (In Progress)

Currently exploring Python, React, and Scikit-learn to develop SmartHire - an AI-based hiring assistant for automated screening and candidate evaluation.

Weather Data Analysis

Analyzed and visualized weather data to identify temperature trends and seasonal patterns using Python, Pandas, Matplotlib and Jupyter Notebook.

Hostel Ease — Web-Based Hostel Management System

Developed a responsive web-based Hostel Management System using PHP, HTML, CSS, JavaScript, SQL, Bootstrap, and PHPMailer to automate room allocation and resident operations.

Spam Email Classifier

Developed a machine learning model to classify emails as spam or not using text preprocessing and TF-IDF features (Python, Scikit-learn, TF-IDF, Logistic Regression).

Spotify Churn Prediction

Conducted Spotify user churn analysis using Python, Pandas, and Scikit-learn to identify key factors influencing customer retention and predict churn behavior.

Library Management System — Online Resource Management Portal

Built a dynamic Library Management System using PHP, MySQL, JavaScript, HTML, CSS, and Bootstrap for efficient cataloging and tracking of resources.

Movie Recommendation System

Built a recommendation system to suggest movies based on user preferences by similarity-based filtering using Python, Pandas and Scikit-learn.

SKILLS

Programming and Tools

Python, React, MYSQL, HTML, CSS, JS, PHP

Scientific Computing & Tools

Jupyter Notebook, Google Colab, Git, GitHub, Excel,
Bootstrap basic API usage

Libraries and Frameworks

Pandas, Numpy, Matplotlib, Tensorflow, Scikit learn,
Seaborn, Keras

Databases

My Sql, MongoDB

CERTIFICATES

Data Visualization: Empowering Business with Effective Insights

Credential id.:7RZ6BXCjv4gJBbp2G
